**DETAILED ACTION**

***Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species	Figure(s)
I	1-6
II	7-8.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, it appears that none of the claims are generic and that claims 1-10 read upon Species I and claims 11-14 read upon Species II.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 2841

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. During a telephone conversation with Salvatore Anastasi on June 15, 2004 a provisional election was made with traverse to prosecute the invention of Species I, claims 1-10. Affirmation of this election must be made by applicant in replying to this Office action. Claims 11-14 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 8 appears to recite an additional wire manager mounted on the component mounting board which is misdescriptive and not supported by the specification or drawings.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Mayer (US 6,305,556 B1). Regarding claim 1, the reference discloses a wire component management system having an enclosure for housing a plurality of components, the system comprising a rack 104 having a plurality of posts (see figure 1), at least one drawer 106, being mounted to the posts of the rack, the drawer having a pair of outside walls (top wall, bottom wall of rack), a pair of movable side walls and a component mounting board (necessarily provided inside 106) located between and being movable together with the movable side walls and a hinged wire manager 100 being mounted between one of the moveable side walls and one of the outside walls, the hinged wire manager having first 300 and second 302 arms being connected to each other by a hinge 304.

Regarding claim 2, the hinge comprises a pin passing through respective pin receiving openings formed in each arm.

Regarding claim 3, each arm has a wire receiving passageway defined by a top, bottom and sidewalls.

Regarding claim 4, each wire receiving passageway has an opening adjacent the pin.

Regarding claim 5, a wire is managed through the hinged wire manager by passing through the wire receiving passageway of the first arm, being looped around the pin, passing through the wire receiving passageway of the second arm and being connected to a component on the component mounting board.

***Allowable Subject Matter***

7. Claims 6-7, 9-10 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

8. Claim 8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phuong T. Vu whose telephone number is (571) 272-2111. The examiner can normally be reached on Mon. & Tues., 7:30 AM - 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David S. Martin can be reached on (571) 272-2107. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
